INTRODUCTION

This is the next quarterly release of this publication and the listings have grown to **over 19,000** slot cards! Unknown and unlisted cards are discovered on a regular basis and the master copy of this guide is a never ending work in progress. The guide includes the CG numbers assigned to each and every slot card as it was entered onto the ChipGuide website. These numbers are also hot links in the electronic copy of the guide so you can click on any CG# and access the pictures of both sides of that particular card. [Additional SCG# numbers work similar to the CG#s to access scans of other items from the Slot Card Guide website that were not added on the ChipGuide for whatever reason.](#)

A very handy resource is the Slot Card BBS at www.slotcardbbs.com where you'll be able to connect with other collectors worldwide. I'll be posting news of new cards there regularly so be sure to check it out.

You might also want to check out the **Slot Card & Room Key Club**. Dues are \$5/year. For information on joining, contact David Johnston, 350 E. Desert Inn Rd. Apt. C-202, Las Vegas, NV 89109 or email: slotcardking@aol.com

I'd certainly like to thank all the collectors out there who helped correct mistakes and provided new information plus those submitting scans to the ChipGuide so we can include as much information as possible. Everyone has helped make this resource much better than it would have been. It's impossible for one person to keep up with everything going on, so thanks again for all your help and support.

WHAT'S INCLUDED, WHAT ISN'T AND WHY!

Of course, we had to decide what constitutes a slot card in order to include it in this listing. The term "slot card" has become a generic term for all casino issued cards. Casinos issue cards for many reasons. The primary reason is to track the play of their customers on slot machines, as machines constitute the lion's share of casino business. However, many casinos use their slot cards to track play at the gaming tables. Other casinos issue separate cards for the tables. Occasionally, cards are issued for racebooks, sportsbooks, bingo, etc. Most of the time, these cards are made of plastic - the size and shape of a credit card. Sometimes, cards are made of paper or cardboard. There may also be some track wagering cards listed under the racetracks.

The first requirement for inclusion in this book is that "slot cards" must be shaped like a card! If it is a booklet or large paper item that doesn't resemble a card shape - then it isn't a "slot card". Yes, the item may have been used to track slot or table play, but if it isn't a card, it normally won't be listed here. **Slightly oversized cards may be listed, but odd, irregular ones are not.**

The second requirement for inclusion in this listing is that the "slot cards" should date from 1982 or later. Let us explain. Before 1982, there were casino cards issued as identification for check cashing, credit, and other reasons. However, it was in 1982 that cards were first manufactured for the purpose of tracking actual gaming action with the intent of giving rewards based on play. Legend has it that this brilliant idea came from an unknown executive at the Sands in Atlantic City. Thus began the modern era of slot cards. Early casino cards are great and would be an excellent subject for another book, but they are not listed here.

The third requirement for inclusion in this listing is that the "slot cards" were actually used to track gaming action (machines, tables or other) or were issued for promotional reasons to attract business. In other words, possession of the card must provide the holder with a casino benefit.

Note: There has been much confusion over the white or other colored cards many casinos use when they have run out of current stock. Most often these are embossed with the casino name BY THE CASINO, not the manufacturer. These temporary cards are not considered a new issue and are normally not included in the listings.

HOW TO USE THIS GUIDE

An explanation of the codes and abbreviations

As you can see by looking at the first column heading, there are 6 different columns which help to identify, describe, and value the cards listed in this book.

The columns are: 1) "Issue", 2) "Predominant Colors/Description, 3) "Mfg.", 4) Rarity, 5) Price and 6) CG# or SCG# -- with a checkbox appearing between the 5th and 6th columns.

What follows is an explanation for each column:

Issue - This column attempts to place all slot cards in chronological order. The earliest is listed first and so on. Cards with "1st", "2nd", etc. are specifically PLASTIC cards used primarily for machine play. **Paper cards are listed after the plastic cards and designated (PC).** There are other paper cards that were used for tracking purposes on games other than slots or tables. **These paper cards are designated with a PCX. All odd paper cards that don't fit the other categories are also placed here.**

Cards that were primarily used for table play are designated as table cards (TC) and placed after the regular issues. The TC designation applies regardless of whether the card is plastic or paper. Table cards are table cards, period. This way, collectors will be able to easily distinguish which cards are table cards, if they wish to collect them separately.

There are some casino-issued plastic cards that were not regular issues used for tracking play. These cards are generally special commemorative issues, tournament cards or promotional in nature - offering some kind of discount or benefit. **These cards are designated (XX). This is the catch-all category where the hard-to-fit cards are placed.**

Starting with this issue, a new CS designation was created for Cruise Ship ID cards that were also use as roomkeys and possibly in the onboard casinos. Cruise ships that had specific gambling related cards still have their cards listed with the issue numbers used in the past.

In summation, here are the six different card categories:

- **1st issue, etc. = Regular issue slot cards that primarily tracked slot play.**
- **XX= Plastic casino cards that were not a regular issue slot or table card. Usually promotional in nature.**
- **TC= Table Card (Any card, usually plastic, that tracked table play only.)**
- **PC= Paper Card that tracked slot play primarily.**
- **PCX= Paper Card that was used for anything except tracking slot or table play.**
- **CS = Cruise Ship ID cards also used as roomkeys and possibly in onboard casinos**

Casinos with several issues of Paper or Table cards may be listed in order as PC1, PC2, PC3 or TC1, TC2, TC2 etc.

2) Predominant Colors/Description - This helps to identify the card based on color and design. The important thing to remember here is that the **PREDOMINANT** colors are listed - NOT ALL colors. Also the description is our best attempt to identify the card's design for easy reference. There may be additional comments under a given card, or comments for a group of cards in the same issue to provide additional information to help identify the specific card(s).

3) "Mfg." - is the manufacturer's or distributor's mark identifying who made the card or possibly the card issue. This could be Faraday, Powercard, PPC, etc. There are only a handful of different marks to worry about, so this is an excellent way to identify cards quickly. Note that CPICA cards may be listed differently. For example, a "CPICA 23677" may be listed as "CP23677" in order to fit on one line.

4) Rarity - This is the best attempt to classify the scarcity/rarity of a given card, based on a consensus of knowledgeable slot card collectors. Some cards may be slightly underrated or overrated. Here's a list of the rarity values and what they mean:

- **Ex Rare - A premier card that exists in only a few collections.**
- **V Rare - Missing from most collections- less than 25 total cards are known or suspected.**
- **Rare - Very hard to find. Less than 100 cards are presently known or suspected.**
- **V Scarce - Hard to find, but obtainable. A few hundred cards are known or suspected.**
- **Scarce - Obsolete, but obtainable. About 1000 cards probably still exist.**
- **Common - Widely and easily available. Huge quantities are known to exist.**

Occasionally, there will be a plus (+) or a minus (-) after the rarity. A plus sign means that the card's rarity is almost at the next level. In other words, a Rare+ is almost rare enough to be listed as Very Rare. Conversely, a Rare- means that the card is almost Very Scarce.

Hard to get current cards (usually higher level cards) are sometimes Scarce, Very Scarce, Rare, etc.

Price - is intended to be the typical value of an issued card in excellent condition. (Excellent condition assumes card has very little or no use and no writing or punch holes - if the card comes without holes.) If no actual sales or offers are known, the price is a reasonable prediction based on availability, appeal, location and overall demand. **Blank cards usually sell for a little more than non-blank cards. Very common cards have a value of 0 since their value is less than \$1 typically.**

CG# - is the unique number assigned to that card when it was added onto the ChipGuide website. Clicking on the CG# in the electronic copy of this guide will access the pictures of that card that are stored on the ChipGuide. CG numbers are not necessarily assigned in any particular order. If a particular card is listed in more than one place it will have the same CG# regardless of what casino it appears under. For other cards that could not be added on the ChipGuide, you'll find a **SCG#** that works in a similar fashion but links to scans on the SlotCardGuide.com website.

A few last things –

There may be additional comments under a given card, or comments for a group of cards in the same issue to provide additional information to help identify the specific card(s).

The term "Raised Printing" means that you can actually FEEL the card's design by rubbing your fingertip gently over the card's surface. Raised Printing makes a card more attractive, but this printing technique is generally found on older cards. Raised Printing is more expensive and makes the card more susceptible to wear. Just to clarify, **RAISED PRINTING DOES NOT REFER TO EMBOSSED PLAYER NAMES OR ACCOUNT NUMBERS ON A CARD – JUST THE DESIGN ITSELF.** In fact, this guide as a rule does not distinguish between ANY post-manufacturer changes on a card. Any exceptions to this rule will be noted in the guide.

Happy Hunting! Robert Baker

IMPORTANT NOTES FOR THIS EDITION

- 1) Wherever older cards were discovered every attempt is usually made to minimize renumbering of existing original entries where possible. In most cases cards are entered as additional variations of existing issues but there may be exceptions.
- 2) **All changes since the 11th edition in January 2016 are marked in RED.** You'll notice that any new casinos that were added will be shown in red in the index also.
- 3) The Windows Navigation information was setup so that feature will now be available for anyone using Windows 2007 or later. The same navigation information will also now appear in the Adobe Acrobat file as well. At the same time the file format was changed from the older .doc to the newer .docx that stores the information in a much more compact size besides providing the newly added features.
- 4) General text & formatting cleanup throughout the entire guide but those changes were not color coded since they did not alter the data. Some of the reformatting was done to make the Windows Navigation information more useful besides making the listings more uniform and consistent throughout the guide.
- 5) Malaysia Genting Highlands & Resorts World Genting cards were completely reorganized and listed together under one combined listing. A number of cards were changed to XX issues after finding they were not true casino cards but still have some possible casino connection.
- 6) **All changes since the 11.1 edition in April 2016 are marked in BLUE.**
- 7) The width of the "Sports Casino" on the 1st and 2nd issue Baldini's cards from Sparks, NV were backwards and have been corrected. The descriptions of the comma placement on the back were assumed correct.
- 8) It was discovered that the 5th, 6th and 7th issue Borgata cards were backwards so those issues were re-arranged. The descriptions were updated to make it easier to identify these issues in the new order.
- 9) Tropicana Laughlin cards are now listed separately from Tropicana Express with new issue numbers.
- 10) A new Mesquite Gaming card was found that was determined should have been between the original 2nd and 3rd issues so the 3rd issue was changed when the new card was added since there were only a few cards involved.

- 11) 2015 copyright Harrah's Total Rewards cards were slightly reorganized to separate out the different manufacturer numbers as more were discovered.
- 12) A few Holland America Line cards were reorganized to better group the cards in some of the newer issues.
- 13) The Tabaret listing under Australia was completely reorganized after a number of new found cards were added so that the cards are grouped in a more logical order. Plus it allows easily adding any additional cards with new Placard numbers if they are discovered.
- 14) Several UK card listings were deleted where there was not enough details to determine which location they were from when a casino had multiple locations and no scans exist to document the card. Other UK card listings were reorganized once the true locations were identified while adding the card scans on the ChipGuide.
- 15) **All changes since the 11.2 edition in July 2016 are marked in GREEN.**
- 16) Note that a portion of all donations received are now shared with the SlotCardBBS to help support that effort as well since the BBS is used heavily to post info on all new cards are they're found or reported.
- 17) Slightly reorganized Seneca Niagara 8th issue cards when a new card was discovered from that time period.
- 18) Several Harrah's 2015 & 2016 cards were slightly reorganized.
- 19) CIRSA Winners Club was previously listed under Peru but was moved to the Universal section after it was found that those cards were used at various casinos world wide operated by the CIRSA Gaming Corp.
- 20) **All changes since the 11.3 edition in October 2016 are marked in PURPLE.**
- 21) **This release completes the integration with the ChipGuide website, with all known slot cards listed in both guides and the scans on the ChipGuide website linked with the listings in this guide!!!**
- 22) For any cards that could not be added on the ChipGuide website the scans are provided from the SlotCardGuide.com website using a unique SCG# for each of those cards. The links work similar to the CG# links for the ChipGuide images but allow adding scans for anything else that doesn't appear on the ChipGuide for whatever reason.
- 23) John Ascuaga's Nugget in Reno became the Nugget Casino Resort so the cards were reorganized between the two listings.
- 24) Oneida Bingo & Casino in Green Bay, WI was reorganized starting from the 9th issue to get the cards in the correct order and the descriptions were updated slightly to make things more clear while adding a newly found card.
- 25) The last few issues from Treasure Bay Casino in Biloxi, MS were renumbered when an earlier card was discovered that should have been the 21st issue.
- 26) Tulalip Bingo & Slots was added as a separate listing and the former bingo cards listed under the Tulalip Casino were moved to the new listing as these are actually two separate locations operated by different tribes.
- 27) Several RSL clubs in Australia were deleted after further research showed they did NOT have any gambling activities within the club and the cards were simply membership cards so they were removed.
- 28) All Playland and Play Time listings from Mexico were removed since these were determined to be video arcades and not gambling related. The rest of the Mexican cards were reorganized while integrating those cards with the ChipGuide listings.
- 29) Two of the cards previously listed under the Shangri La Casino in Russia were really from the Shangri La Casino in Armenia so the listings were corrected and reorganized when additional Russian Shangri La Casino cards were added.
- 30) The entire Russia section was totally reorganized after a large number of new cards were discovered along with additional reference lists from Russia listing the casinos prior to the government closing of most Russian casinos in 2009. Most of the scans were added on the ChipGuide and the CG numbers for each identifiable card were added to the Slot Card Guide.
- 31) The Ukraine section was also reorganized when reconfirming all information while merging the Slot Card Guide info with the ChipGuide. A number of entries that could not be confirmed after extensive research were deleted while others were renamed, etc. If anyone has a card that was previously listed but deleted and you believe it should be relisted, please submit scans and info on the card via the ChipGuide or email me directly and I'll get them relisted.

MONTANA

(NOTE: Non-Indian Montana casinos were very small and cards were very difficult to obtain. As a general rule, most non-Indian casinos did not want to issue cards to non-locals! If you were lucky enough to get one issued, you only got ONE. Most had you fill out an application and return 1-2 weeks later to pick it up. Most of the non-Indian Montana casinos did away with cards and went to a pin number, or magnetic tab although some are back to using standard slot cards again. Values are based on their previous availability for those casinos that have stopped using cards.)

(This may have been the first Las Vegas slot club card, and therefore is in very high demand.

It was like the Mint's set up whereby there was a ticket dispenser attached to dollar machines.

The card was more like an ID used to redeem the tickets. Obverse has a Golden Nugget logo

on the bottom right corner. On the reverse, there is NO magnetic stripe, only a signature strip

across the top. The last paragraph reads: "This card is NON-TRANSFERABLE and is the

property of GNLV corp., P.O. Box 610, Las Vegas, Nevada 89125." This card is very similar

to the 2nd issue card, except the 3rd line on the reverse begins "24 Karat Club")

We believe the Slot Club opened sometime in late 1986 or early 1987, but closed well before Harolds shut its doors permanently in 1995. A bidding war on Ebay in Spring, 2001 resulted in a then record high bid of \$310 for this slot card.)

(The crinkled metallic cards have a holographic background and appear bright or dull depending on the angle they are viewed. One set of cards will appear bright when viewed at the same angle that the other set appears dull.)

(Here's how "Reel Rewards" worked: When a customer redeems his points for cash, he is given the option of taking double the amount in "Reel Rewards". Since it's a good deal, most people redeem their points this way. The customer is given the Reel Rewards cards and has to play the amount through at least once. Therefore, if he has a \$20 card, he has to gamble \$20 at least once. Whatever is left over can be cashed out.)

 (Raised Printing. One blank appeared on the market sometime in early 2002 that came from a former Landmark employee. She only found the one card, despite unfounded rumors to the contrary. That brings the total known pieces in collectors' hands to exactly 3. It is believed that this VIP Gold Card was introduced shortly before the Landmark closed. This card has brought the highest price ever for a slot card: \$1085 on Ebay before the 3rd was discovered.)

(NOTE: Before closing, the Landmark ran out of cards. They used a blank silver card and just printed "Landmark" on the obverse. As this was not a manufacturer card, it is no longer listed here as an "officially" collectible card. There was also a blank silver card which said "Landmark Hotel and Casino Wild Card.") CG111335

(Blue cards were only issued to high rollers. Though the reverse indicates the card was used on slots and tables, the only known examples are from table play. Several high rolling machine players at the time did not receive these blue cards, but rather the green ones. We know that management felt that the blue color was inconsistent with MGM's color scheme and replaced them with the green cards very quickly, perhaps explaining why other players never got them.)

3 rd	Dk Green/Silver ("Easy Money" Cartoon Slot)	None	V Rare	75	□	CG062524

4 th	Dk Green/Silver ("Easy Money" Cartoon Slot)	None	V Rare+	100	□	CG111846
(Virtually identical to above 3 rd issue card, except the cartoon slot machine has a RED tongue . There are also a couple very, very minor font differences. For example, on the second line of the reverse, the exclamation mark is over the "w" instead of the "h" like the 3 rd issue. As of now, this red tongue version appears to be much rarer than the white tongue and a case might eventually be made that it should be rated Ex Rare.)						
5 th	Green ("Easy Money MGM Sands")	None	Ex Rare	200	□	CG111847
(This is the only permanent card from the MGM-Sands Era (1988-89) and is quite rare and desirable. The same basic design with the cartoon slot machine was continued when the Sands dropped the MGM partnership after less than a year.)

(There are differences in the brown Cartoon Slot known for this card but they are very slight differences and not as noticeably different as with the next issue.)

(These are among the most desirable of Reno cards. Less than 5 "Wrangler" cards have surfaced, and only 2 "Buckaroo Club" cards are currently known. In an earlier Edition these cards were mistakenly reported as issued in the early 1990's, but later received first hand testimony to the contrary from collector Emile Giroux. He was possibly the last person ever to be issued a card in this club as he was there right before they closed in July, 1997. He was exactly the 700th person to be issued a permanent Buckaroo Club card. The Virginian was a slot only casino from Dec 1996 to July 1997, when it closed due to a near-complete lack of business!)

Then when they switched to the new generic Golden Nugget 24K Select cards they added another prefix in front of the earlier number so you'll see the two prefixes back to back in the player number. **The first 3 digits are the Golden Nugget prefix and the next 3 digits are the Trump One card prefix.**)

(These cards are extremely significant in that they were the absolute first actual slot cards whereby play was tracked by the computer. This card was originally tested and used in small town Nevada, specifically Tonopah. Also, the card was used in bar-type establishments. The biggest of these was the location that became Danny's Country Store.)

RUSSIA

All Russian casinos were closed in June 2009 and it is unclear which casinos may have re-opened in the new gambling zones!

Note: Most cards issued from Russia were not in English. The casinos are listed under the English translation & English letters/numbers where used where possible in the Russian words. **If you can't find the desired casino with "Casino" as the first word in it's name, try checking the same casino with "Casino" as the last word in it's name.**

Also note that when the casinos went from embossed player information to printed player information the reverse text was typically moved. Many of these variations may not yet be listed so be aware these may exist!

APPENDIX C:

Tips for Identifying Russian Slot Cards

You could just try translating the Russian text using the Google translator with the Russian keyboard. Or on an Android phone you can try using the Google translate application where you view the card through the phone camera while the application tries to translate the text. But these methods can be time consuming and difficult to use, especially with odd fonts.

Another way to identify cards is to use a feature on the ChipGuide website where you can view all the Russian slot card images and try to match your card with one of the listed cards. To use this feature, go to the ChipGuide.com website and select the ChipGuide Query Facility from the menu on the left side. On the ChipGuide Query page, select Europe for the Region, Russian Federation for the State and Players Club (Slot) Cards for the Collectible Type then click the Query button.

The query will display page after page of slot card images (front and back) so you can page through the images and try to match your card with one of the images shown. You can click on any of the images to see a larger view if you need to check details. When you think you've found a matching card you can click on the CG# displayed under the image to get more information on the card and the casino it's from. From that detail page, if you click on the casino name you'll get the full listing for that casino.

If you can't find your card listed under the Russian cards you might want to try checking the Ukraine cards since they are very similar. Or you can try any of the other surrounding countries that use Russian text using the same technique. Just use a similar query and select Ukraine or whatever desired country for the State to see all the card images from that country.
